Support group for parents of children with cancer who can relate to your experience at any stage, whether your child has finished treatment or is currently going through the process.

When a parent learns that their child has cancer, their world is turned upside down. Childhood cancer treatment and recovery is intense, and the entire family is affected. Join other parents in our local area in sharing experiences, strengthening your emotional support network, and developing practical skills to cope with this challenging time in your family's life.

This activity is supported by an educational grant provided by

and Genentech.
