

Lunch & Learn

Frankly Speaking about Metastatic Breast Cancer

With Dr. Ali Cheaito

With improvements in the early detection of breast cancer and the development of more effective systemic therapies, breast cancer patients have more options than ever before. Goals of treatment have been to delay disease progression, prolong survival and maintain a good quality of life. The purpose of this discussion is about surgical options available for patients with metastatic disease. Lunch will be graciously provided by Adventist Health Simi Valley.

The speaker, Dr. Cheaito, MD, FACS, is a general surgeon who is also skilled in many specialty surgeries and offers advanced minimally invasive options for any procedures. He is certified by the American Board of Surgery, has presented on numerous national and international meetings, helped develop a multi-disciplinary team for management of cancer at Olive-View UCLA and was on faculty at UCLA for 7 years.

Date: Thursday, February 21st, 2019
